

# Granulometry

- Determining granulometry is not obligatory for each registrant under REACH
  - It must be included in joint section of Registration Dossier
- However, each registrant recommended to determine granulometry as part of the proper identification and characterisation of its substance
  - See recommended stepwise approach below
    - Commented extract of figure R.1.7-7 ECHA Guidance on information requirements and chemical safety assessment - Chapter R.7a: Endpoint specific guidance)
