

9.24. Exposure scenario 24: Service life (consumers) - Service life of batteries

Environment contributing scenario(s):		
CS 1	Service life of batteries	ERC 10a, ERC 11a
Consumer contributing scenario(s):		
CS 2	Simple handling of the battery e.g. replacement into an electronic device or reloading	AC 3

Exposure scenario(s) of the uses leading to the inclusion of the substance into the article(s):

ES5: Use at industrial sites - Use of silver metal in the production of batteries

9.24.1. Env CS 1: Service life of batteries (ERC 10a, ERC 11a)

Assessment entity group used for the assessment of this contributing scenario: Silver in massive form

Exposure assessment and risk characterisation are not required (see scope under 9.0.3).

9.24.2. Cons CS 2: Simple handling of the battery e.g. replacement into an electronic device or reloading (AC 3)

Assessment entity group used for the assessment of this contributing scenario: Silver in massive form

Exposure assessment and risk characterisation are not required (see scope under 9.0.5).
